PROFILE

Software engineer with over nine years of experience in distributed, legacy, and industrial systems. Skilled in C#/.NET, real-time integrations, and enhancing operational software for high reliability. I leverage AI-assisted development to expand my focus to product and interface work, while maintaining responsibility for architecture, verification, and quality.

PROFESSIONAL EXPERIENCE

GIAMMAR · System Ceramics / *Software Engineering Consultant* **2024 - Present**

- Develop distributed .NET services for industrial manufacturing R&D, integrating PLCs, OPC UA, RabbitMQ, Redis, and real-time machine data.
- Designed custom binary-protocol connectors and a robust quality data pipeline to support real-time decision-making, defect reprocessing, and long-term traceability.

MSC Mediterranean Shipping Company / *Senior .NET Developer* **2021 - 2023**

- Enhanced global shipping systems with C#, C++, SQL, stored procedures, and legacy code. Collaborated with US teams, including a six-week onsite assignment.
- Contributed to the redesign of a backward-compatible manager-agent platform and led a four-person team overseeing document flow across third-party services, the central platform, and SAP.

Amaris · Credemtel / *.NET Backend Developer / IT Consultant* **2019 - 2021**

- Developed document management services using .NET, REST APIs, RabbitMQ, Elasticsearch, ETL pipelines, and structured logging.
- Designed a reusable package for managing arbitrarily nested, configuration-driven JSON documents across APIs and services.

iSolutions Software Engineering / *Full-stack Developer* **2021**

- Maintained applications, identified hidden dependencies, and delivered incremental updates while preventing regressions.

EARLY CAREER

2016 - 2017

STARWORKGC Junior Programmer & Particle Effect Artist

Joined during high school and rewrote a real-time Unity/C# collision predictor for Galactic Fighters, balancing configurable warnings with lower-end hardware performance.

[Galactic Fighters on Steam ↗](#)

2017 - 2018

MELAZETA Unity Developer Intern

Built Unity mobile and AR experiences, including a Winx dress-up application released on Google Play.

SKILLS, SELECTED WORK & CREDENTIALS

CORE

C# / .NET · distributed systems · software architecture · industrial integration · legacy modernization

TECHNOLOGIES

RabbitMQ · Redis · Elasticsearch · SQL · REST · OPC UA · PLCs · Quartz · C++ · Unity

OSUS · INDEPENDENT LAB

RosettAI · FCHForge · OSUS Ecosystem · Sounds

Products across AI document processing, industrial tooling, shared services, and consumer software.

AI-ASSISTED DELIVERY

Accelerates interface work and prototyping; architecture, validation, testing, security, and trade-offs remain my responsibility.

ENGLISH

C2 comprehension · EF SET 84/100

Reading 78 · Listening 90

[Verified certificate ↗](#)

EDUCATION

IIS F. Corni, Modena

Diploma in Computer Science · 2018
